Art Unit: 2665

1. In-the specification, page 1, the applicant is requested to update the status from time to time for the listed related co-pending application.

2. Claims 8-10, 12-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, it is confusing for reciting "a system" in the preamble, which comprises a plurality of computer or processor related executable instructions, since an apparatus claim cannot include instructions to carry out the method steps.

3. Claims 1-5, 8-10, 12, 15-17 and 19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 9-12 of U.S. Patent No. 6,668,051. Although the conflicting claims are not identical, they are not patentably distinct from each other because by incorporating the data traffic redirecting scheme of GIUHAT et al., for avoiding the unnecessary accessing facilities of the carrier, in U.S. Patent No. 5,881,145 into the system of U.S. Patent No. 6,668,051, for the purpose of improve the system efficiency, and utilizing well known TCP/IP link in U.S. Patent No. 6,668,051 as the communication link for connecting the communication control module and ICP, it would have been obvious to make the same invention as claimed in the instant application.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 6, 7, 13, 14, 18, 20 and 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Carson et al. '724 & EP 0 792 074 A2, Kabay et al., March et al. are all additionally cited to show the feature of data calls redirecting/rerouting upon the detection of signaling messages from signaling network similar to the claimed invention.
